Coverage

Spatial Extent: N:-52.6637 E:-60.4977 S:-70.6332 W:-77.77555

Temporal Extent: 2001-03-18 - 2003-03-05

Dataset Description

Event logs provide an overall summary of the sampling activities during a cruise. A hard copy of the event log is also included in each cruise report.

Parameters

Parameter	Description	Units
cruiseid	Cruise identifier, e.g. LMG0103 = ARSV Laurence M. Gould cruise number 0103.	
year	year, e.g. 2001.	
platform	Ship, mooring, or fixed location name.	
timediff	Number of hours added to local time to convert to GMT (e.g. +4).	
event	event or sampling operation number	
inst	instrument used to collect data, see: instrument list	
cast	cast number	
station	consecutive station number	
station_std	standard broad-scale station number, per assigned,	
day_local	day of month, local time	
month_local	month of year, local time	
time_local	time of day, local time, using 2400 clock format	
se_flag	sampling operation start (s) or end (e) flag	
lat	latitude, negative = South	
lon	longitude, negative = West	
depth_w	depth of water	meters
depth	depth of sample	meters
si	scientific investigator's name	
region	geographical area of sampling	
day_gmt	day of month, gmt time	
month_gmt	month of year, gmt time	
time_gmt	time of day, GMT	
comments	free text comments

Project Information

U.S. GLOBEC Southern Ocean (SOGLOBEC)

Website: http://www.ccpo.odu.edu/Research/globec_menu.html

Coverage: Southern Ocean

The fundamental objectives of United States Global Ocean Ecosystems Dynamics (U.S. GLOBEC) Program are dependent upon the cooperation of scientists from several disciplines. Physicists, biologists, and chemists must make use of data collected during U.S. GLOBEC field programs to further our understanding of the interplay of physics, biology, and chemistry. Our objectives require quantitative analysis of interdisciplinary data sets and, therefore, data must be exchanged between researchers. To extract the full scientific value, data must be made available to the scientific community on a timely basis.

Program Information

U.S. GLOBAL ocean ECosystems dynamics (U.S. GLOBEC)

Website: <http://www.usglobec.org/>

Coverage: Global

U.S. GLOBEC (GLOBAL ocean ECosystems dynamics) is a research program organized by oceanographers and fisheries scientists to address the question of how global climate change may affect the abundance and production of animals in the sea.

The U.S. GLOBEC Program currently had major research efforts underway in the Georges Bank / Northwest Atlantic Region, and the Northeast Pacific (with components in the California Current and in the Coastal Gulf of Alaska). U.S. GLOBEC was a major contributor to International GLOBEC efforts in the Southern Ocean and Western Antarctic Peninsula (WAP).
